

KiwiCash e-Bike Dock

The KiwiCash e-bike dock offers a complete overnight solution for e bike users while on a trail. These docks have been designed to provide shelter, security and charging all housed in one simple to use unit.

The chargers operate by the KiwiCash system meaning all transaction data is displayed to the operator in real time.

The user can simply tap to operate and even book in advance to ensure a space for their visit.

The dock can be installed almost anywhere with a power connection and on any surface. The docks arrive fully constructed with local contractors installing on site. Optional extras include bike wash connection, security cameras, remote internet connection and lights.

The standard model showing houses four bikes at one time but can be extended to suit the operator's needs. All our products are produced using quality New Zealand products manufactured in Blenheim.

We are 100% Kiwi made, owned and operated. All our technology is designed and produced within New Zealand, the web service are hosted in Wellington and our Blenheim based team is available 24/7 guaranteeing great ongoing service and support.
